

MAYANK SINGH

Full Stack Developer | Software Engineer

Phone: +91 9244547714 | Email: simayanksingh446@gmail.com | Location: Vidisha, MP, India

GitHub: <https://github.com/mayanksingh446> | LinkedIn: <https://www.linkedin.com/in/mayank-singh-8839b9320>

PROFESSIONAL SUMMARY

Full Stack Developer proficient in Java, JavaScript, Python, TypeScript, React.js, Node.js, Express.js, and MongoDB. Experienced in engineering responsive frontend interfaces, dynamic web platforms, secure REST APIs, and database solutions using MySQL and MongoDB. Possesses a strong Computer Science foundation in Data Structures and Algorithms, Object-Oriented Programming, and software architecture. Seeking an entry-level Software Engineer or Full Stack Developer role to deliver scalable, high-quality software.

TECHNICAL SKILLS

- **Programming & Frontend Languages:** JavaScript (ES6+), TypeScript, Python, Java, HTML5, CSS3, SQL
- **Frontend Frameworks & Libraries:** React.js, Next.js, Redux, Tailwind CSS, Bootstrap
- **Backend Technologies & Frameworks:** Node.js, Express.js, RESTful APIs, WebRTC, Socket.IO
- **Databases & ORMs:** MongoDB, MySQL, Mongoose
- **Developer Tools & Platforms:** Git, GitHub, Postman, VS Code, npm
- **Core Computer Science Concepts:** Computer Science, Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), JWT Authentication, System Architecture

WORK EXPERIENCE

Full Stack Web Development Trainee & Developer

Apna College Project Training | Remote

01/2024 – Present

- Engineered dynamic web applications using modern frontend languages and backend frameworks like Node.js and Express.js.
- Utilized Python scripts for data processing and integrated RESTful APIs with relational and non-relational databases (MySQL, MongoDB).
- Applied core Computer Science principles and collaborative version control workflows via Git and GitHub.

PROJECTS

Hostel Booking System(In progress) | 01/2026 – Present

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, REST APIs

- Architecting a full-stack hostel booking platform enabling real-time search, room comparison, and automated reservation workflows.
- Implemented robust user authentication and role-based access control using JSON Web Tokens (JWT).
- Engineered dynamic filtering algorithms for real-time room availability, pricing, and amenities management.
- Designed responsive client-side UI components with modern frontend languages and integrated RESTful APIs.

Video Meeting Platform (Zoom Clone) | 10/2025 – 12/2025

Tech Stack: React.js, Node.js, Express.js, Socket.IO, WebRTC

- Engineered a real-time web conferencing platform enabling multi-user peer-to-peer audio and video transmission.
- Integrated WebRTC for low-latency media streaming and Socket.IO for signaling channel event management.
- Constructed interactive meeting management tools including room creation, screen sharing, dynamic audio/video controls, and participant management.
- Optimized connection handling and reconnect logic, reducing stream buffering and improving call stability across devices.

AI-Powered Code Reviewer | 08/2025 – 09/2025

Tech Stack: React.js, Python, Node.js, Express.js, Gemini API, Monaco Editor

- Constructed an automated AI code review platform that analyzes syntax and delivers instant optimization recommendations.
- Integrated Google Gemini API and Python integration modules to generate intelligent feedback across multiple programming languages.
- Embedded the Monaco Editor component into the interface, providing interactive in-browser syntax highlighting and code editing.
- Implemented secure session handling and JWT-based security protocols for user authentication.

E-Commerce Online Bookstore | 05/2025 – 07/2025

Tech Stack: React.js, Node.js, Express.js, MongoDB, MySQL, JWT, REST APIs

- Architected an end-to-end e-commerce platform supporting book discovery, dynamic category filtering, and item previews.
- Designed and deployed scalable RESTful API backend endpoints connected to MySQL and MongoDB for inventory control and order tracking.
- Built a client-side shopping cart workflow with state persistence and secure checkout flow.

ACHIEVEMENTS & LEADERSHIP

- **3rd Place – College Hackathon:** Collaborated with a 4-member engineering team to design and build an innovative web application within a 24-hour hackathon, securing 3rd place overall.
- **Technical Event Coordinator – Flex Technical Club:** Organized and facilitated technical workshops, coding challenges, and Technovision, managing event logistics and leading peer development initiatives.
- **Full Stack Web Development Certification – Apna College:** Completed rigorous hands-on training covering HTML5, CSS3, JavaScript, React.js, Node.js, Express.js, MongoDB, and REST API development.

EDUCATION

Bachelor of Technology (B.Tech.) in Computer Science and Engineering (Blockchain)

Samrat Ashok Technological Institute | Vidisha, MP, India

08/2023 – 06/2027 (Expected) | CGPA: 7.09 / 10.0
